Telefónica Tech

IT Asset Lifecycle Solutions

Maximise the value of end of life IT assets and contribute towards your organisation's sustainability goals

Monetise your decommissioned data centre and workplace assets and ensure secure data destruction

Ensure IT governance

Your devices contain confidential data, our fully accredited recycling facility ensures 100% secure destruction of any data.

Sustainable asset disposal

Prevent unnecessary landfill by reusing and recycling equipment wherever possible, and when equipment must be disposed of our service is fully WEEE compliant

Global scope & capabilities

Consistent support and processes for your locations around the UK, Ireland and worldwide, maintaining your high standards and most importantly, protecting your brand

Sustainability

Sustainability needs to be integral to any digital transformation strategy. As technology needs evolve and change, proactively planning for the removal of retired IT assets – in a secure and sustainable manner – is critical.

Integrating Asset Lifecycle Services into your IT strategy is an opportunity to proactively manage risk/compliance and positively impact ROI.

"2/3 of companies have an environmental sustainability strategy for their IT organisation."
(The Circular Economy and IT Mindsets Study)

Manage your entire asset lifecycle

IT teams face a multitude of asset lifecycle challenges including IT asset management and WEEE disposal compliance, Telefónica Tech's IT Asset Lifecycle Solutions are more than just IT equipment removal, they manage the entire lifecycle across your multi-vendor environment.

Security

With data security being paramount, our service offers a certified 3-pass wipe as standard, removal of all customer identification, testing, all with a transparent audit trail process for recycled devices.
